Laura Boornazian, SIO
Site Investigation & Support (3HW23)

George Bochanski, Director
Office of Public Affairs (3PA00)

C & D Recycling is a recently identified site in Freeland Township, Pa. which we are currently investigating in response to a citizens complaint (Jane Sulima). Results of two well samples in the area by PA DER revealed elevated levels of lead in the drinking water. A preliminary assessment (PA) and site investigation (SI) were initiated last week; both will be performed by PA DER.

Jay Rodstein, an On-Scene Coordinator in the Emergency Response Section, is also investigating the site. We both visited the site on Thursday during DER's SI. We had agreed to meet Jane Sulima at her residence on Wednesday evening before the site visit for an informal discussion of the situation and to discuss our role in investigation of the site. As it turned out, about 20 citizens were present at the meeting which lasted about 2 hours.
